Position open date: 05/06/2017  
Location: Larnaca

## Description

**Job Title:** Senior Business Intelligence Engineer

**Duration:** Fulltime

**Location:** Larnaca

### Role:

The goal of the Diangle Solutions BI Analytics team is to foster a data-driven culture, to encourage and enable our business partners to make more informed decisions through data. As the volume of data and the demand for solutions grows, we need a strong and experienced BI Software Developer who can design & develop on Data systems and help manage day-to-day operations.

We are looking for a BI Software Developer passionate about data, who is experienced with a full range of data warehousing skills. You should have a good track record of working with information workers, understanding their information needs, and be able to implement pragmatic solutions using an iterative, agile approach.

If you are comfortable working in a start-up effort, enjoy incrementally marching towards a well-defined long-term architecture, and are motivated by solving hard business process problems with technology then this could be the position for you.

### **KEY ACCOUNTABILITIES:**

- Design, build and deliver the data model and warehouse platform that enables self-service BI and customized solutions.
- Own Technical design of components with overall systems view.
- Drive the creation of operational dashboards showing data feed operation and data quality issues.
- Drive the creation of an adoption dashboard displaying a view of active users, database size, count of database tables, entities, queries, etc.
- Collaborate with our business partners to understand objectives, deliver maximum business impact and return on investment.
- Identify opportunities to leverage predictive analytics and define their requirements.
- Implement data processing and monitoring standards to address data quality.
- Ensure the data warehouse and reporting solutions are stable, supportable, extensible, and trusted by our business partners.

### Essentials:

- Strong skills and experience in T-SQL, Microsoft BI stack, SSIS, SSAS, Power BI.
- Strong design and architecture skills with a strong bias for BI & analytics approaches.
- Experience in partnering with engineering & information architecture on design & architecture.
- Strong background in data warehousing principles, architecture and its implementation in large environments.
- Proven skills in database design and multidimensional modeling.
- Experience with ETL, data modeling, and working with Business Intelligence systems.

# Diangle**SOLUTIONS**

- Development experience in Big Data platforms, Cortana Intelligence Suite, service layers and other assorted reporting/distribution assets is preferred.
- Exposure to .NET and AzureML is a plus.
- SharePoint knowledge is a plus

## **Top 3 Skills :**

- MS BI Stack (SIS, SSAS, tabular cube) 5+ years experience
- Experience building data warehouse platform and dimensional building concepts 5+ years
- Power BI 2 + years

**€3,100+ / month Salary**
